

Tocad Energy Supports Japan Climate Initiative's Call for Higher NDC and Renewable Energy Target

Tokyo, Japan – 22 April 2021 – Tocad Energy Co., Ltd. (President & CEO: Takeshi Fujikawa) announced today that it supports the message released by Japan Climate Initiative (JCI) calling on the Japanese Government to strengthen the country's Nationally Decided Contribution (NDC) to reduce national emission by 45% or higher, as well as to raise Japan's 2030 target of renewable energy to 40-50%.

As a member company of JCI, Tocad Energy Group endeavors to make continuous contribution to the realization of a sustainable society by producing reliable and safe rechargeable battery packs to satisfy different customers' needs.
